

Preparation of 2-dihaloacyl-3-aminoacrylic esters and 3-dihalomethylpyrazole-4-carboxylic esters

A b s t r a c t

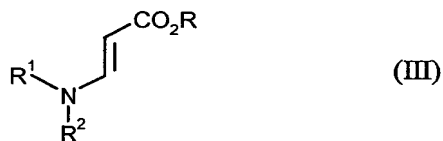

The present invention relates to a process for preparing 2-dihaloacyl-3-aminoacrylic esters of the formula (I)

characterized in that
acid halides of the formula (II)

are reacted with dialkylaminoacrylic esters of the formula (III)

in which R, R¹, R², X¹, X² and Hal are each as defined in the description

in a water-immiscible organic solvent in the presence of a base,

to the novel 2-dihaloacyl-3-aminoacrylic esters of the formula (I) themselves, to their use for preparing 3-dihalomethylpyrazoles, to a process for preparing 3-dihalomethylpyrazoles, and also to novel 3-dihalomethylpyrazoles.
